THE EFFORT AND ITS REWARD

Nothing like wine manages to be both symbol and expression of a land and of its generosity and vigor.

Nothing like wine manages to be both symbol and expression of a people and of its values and its labors.

Nothing like wine manages to be both symbol and expression of a prize, Hard earned, long awaited and generous.

In no other part of the world are land, wine and people so fused in an ancient and unique nexus as in Tuscany and as in Chianti Classico.

For us at the Fattoria La Loggia, wine is the symbol of hard, meticulous work and of knowledge handed down from the distant past, from the times of the Medicis, the first owners of the estate.

It is the symbol of a daily commitment imposed on us by our tradition, the same that has made the Black Rooster the distinctive sign of one of the world's greatest and most loved wines.
